ENVIRONMENTAL CHAMBER

Range :

- Temperature : -20°C ~150°C
- Relative Humidity : 20% ~ 99 %

Accuracy :

- Temperature : $\pm 1^{\circ}\text{C}$
- Relative Humidity : $\pm 5\%$ @<50%RH
 $\pm 3\%$ @>50%RH

Features :

1. With USB download function, RS232 interface, curve software, not necessarily to have a data logger it can connect to computer and any device freely
2. With vacuum glass observation window, more effective direct observation function
3. Flow calculation control of refrigerant servo valve, saving 30% of electricity, with residence time sleep function, saving more than 50% of energy
4. The controller is SGS certified for electromagnetic interference protection; with software matching of more than 32 digits, with multiple development and software upgrade functions
5. Passed ISO-9001 quality certification
6. Defrost cycle (800 cycles of defrosting, each defrosting is guaranteed to be within 2 hours, and the integrated test achieves 25% energy saving)
